

LightJet430-Premium Posters

The LightJet produces the fastest and highest quality digital print available. LightJets are ideal for any print application, including posters. Photographic images are true to life, and illustrations and text are crisp and clear. Pantone colors are matched 80% or higher.

We have developed a pricing program that makes large LightJet prints, size 16x20 to 4ftx10ft, so affordable that they can be used as posters. At prices as low as **\$1.60 per square foot**, LightJets can be used for a one time use application and thrown away. No other print can match the low cost and high quality of a LightJet.

For example: **50 22"x28"** LightJets for only **\$420.00**

LightJet430 Premium Large Format Printing

The best output in the world comes from the [LightJet430](#) digital printer. This printer is so fast that it made our highspeed inkjet printer obsolete. We can now offer the same turnaround and prices for a print that far surpasses the quality of an inkjet. Inkjets, which simulate photo quality with half-tone dot patterns, would have to print at 4000dpi to match the color and clarity of these prints.

One of the greatest benefits of the LightJet430 is affordable pricing. The cost is generally less than that of an inkjet. **In fact, if you provide us with a full color inkjet quotation from a competitor we will beat it, [guaranteed](#).**

LARGE FORMAT PRINTS-P.O.P. AND MORE

LightJet prints can be used in almost any situation. Available up to size 4'X10' seamless, they are ideal for indoor pop signage, tradeshow graphics, even permanent artwork. We offer a variety of [mounting and lamination](#) options including encapsulation. Our [premium poster pricing](#) offers an added discount for large print quantities. Prints are on Fuji Crystal archive photographic paper.
