

LIGHTJET PRINTING FROM RASTER FILES

ALWAYS:

- SEE THE COLOR MANAGEMENT AND MONITOR CALLIBRATION PDF- [CLICK HERE](#)
- CHECK RESOLUTION AT FINAL PRINT SIZE
- SAVE FILES IN .TIF FORMAT

FINAL PRINT SIZE	APPROXIMATE FILE SIZE	RECOMMENDED DPI
5x7	4MB	200dpi
8x10	10MB	200dpi
8.5x11	11MB	200dpi
11x14	18MB	200dpi
16x20	20.6MB	152dpi
20x24	30.9MB	152dpi
20x30	39MB	152dpi
24x36	56MB	152dpi
24x48	74MB	152dpi
30x30	58MB	152dpi
30x40	78MB	152dpi
30x50	97MB	152dpi
40x40	103MB	152dpi
40x50	129MB	152dpi
40x60	155MB	152dpi
50x50	161MB	152dpi
50x60	193MB	152dpi
50x72	232MB	152dpi
50x84	271MB	152dpi
80x96	309MB	152dpi

This is an example of Adobe Photoshop's **Image Size** window. Check that the **Print Size Height** and **Width** are set to your intended final print size and that the **Resolution** is set to the recommended DPI (refer to chart)

When your file is set to final print size view it at 100% or Print Size. This will reflect printed image appearance.

Extremely large prints, such as 10ft murals, need only be 100dpi.

Black & White images should be saved in grayscale color mode.
